

## SUMMARY

---

Aspiring Full-Stack Developer with hands-on experience in React.js, Node.js, Express.js, and MySQL. Built AI-based, interactive, and full-stack web applications with exposure to startup and client projects through CodeDef. Interested in software development and creating impactful digital solutions.

## EDUCATION

---

- **Aurora Deemed To Be University Associated With NIAT** Yadadri, Telangana  
*B.Tech in Computer Science* 2025 - Present
- **Sree Dattha Institute Of Engineering And Science** Ranga Reddy, Telangana  
*Diploma in Computer Science* 2022 - 2025

## PRACTICAL EXPERIENCE

---

- **Co-Founder - Frontend Developer – CodeDef (Present)**: Worked as a co-founder and frontend developer in a developer-focused organization delivering web solutions for startups and businesses. Developed responsive web applications using React.js, JavaScript, HTML, and CSS while collaborating with teams to convert business requirements into scalable solutions.

## PROJECTS

---

- **Rathh – Travel Platform (Client Project under CodeDef)**: Developing a travel platform acting as a bridge between international travelers and curated travel experiences across India. Built reusable React.js components and responsive user interfaces while focusing on usability and cross-device compatibility.  
Technologies: React.js, Tailwind CSS  
link : <https://rathh.vercel.app/>
- **ADU Food Court – Smart Canteen Management System**: Developed a full-stack smart canteen management platform with separate student and admin dashboards for digital food ordering and operational management. Implemented menu CRUD operations, order tracking, pickup slot selection, and role-based authentication.  
Technologies: React.js, Node.js, Express.js, MySQL, Tailwind CSS.  
link : <https://adufoodcort.vercel.app/>
- **RideShare50 – Ride Sharing Web Application**: Developed a web-based ride-sharing platform to help users share rides and reduce travel costs. Built interactive user interfaces. Focused on usability and responsiveness to ensure smooth user experience across devices.  
Technologies: HTML, CSS, and JavaScript.  
link : <https://vivek0929.github.io/Rideshare50/>
- **AgentX – Multi-Agent AI Platform**: Designed and developed an AI-powered platform with an interactive chat interface using HTML, CSS, and JavaScript. Integrated Lyzr AI multi-agent architecture for autonomous prompt engineering, workflow execution, API communication, and session management.  
Technologies: HTML, CSS, JavaScript, Lyzr AI, Multi-Agent Systems, REST APIs.  
link : <https://vivek0929.github.io/Agent-PromptX/>
- **Coding Club Website**: Designed and developed a responsive website to showcase coding club activities, events, and learning resources. Deployed the website using GitHub Pages.  
Technologies: HTML, CSS, JavaScript and Bootstrap.  
link : <https://vivek0929.github.io/CodingClub/>
- **Smart Parking System**: Developed a Python-based parking management system for handling vehicle entry, exit, slot allocation, duplicate detection, and revenue management using Object-Oriented Programming concepts.  
Technologies: Python, OOP, Data Structures
- **FLAMES Game – Logic-Based Web Application**: Created an interactive web application implementing the FLAMES relationship prediction logic. Handled user input validation and dynamic result generation using JavaScript. Enhanced user engagement through simple design.  
link : <https://vivek0929.github.io/FLAMES-GAME/>

## ACHIEVEMENTS AND RESPONSIBILITIES

---

- **2nd Position** : Runner-Up in a college-level Hackathon conducted at Sree Dattha Institute of Engineering and Science (Diploma).
- **ECET 3632**: In TG-ECT

## TECHNICAL SKILLS

---

- **Languages**: Python, JavaScript (ES6), SQL, HTML5, CSS3
- **Frontend Frameworks Libraries**: React.js, Bootstrap, Tailwind CSS
- **Backend Frameworks**: Node.js, Express.js
- **Databases**: MySQL
- **Tools**: Git, GitHub, Postman, VS Code, Antigravity, Vercel, Railway, Render
- **Concepts**: OOP, REST APIs, JWT
